

Md Kamrul Hasan

Software Engineer

Software Engineer specializing in Flutter with over 2 years of experience building scalable, feature-rich mobile applications. Skilled in clean architecture, REST API integration, and backend development using Go, Firebase, and MySQL, with a strong focus on performance optimization and agile team collaboration.

Dhaka Bangladesh | +(880) 1874-449124 | hasankamrulhp@gmail.com | linkedin.com/in/kamrulhn/

Key Skills

Flutter & Dart | REST API Integration | Firebase | Go (Golang) Backend | Clean Architecture

Work Experience

BDStall.com LTD, Dhaka

Software Engineer (Jan. 2025 – Present)

- Fixed major bugs and optimized performance, growing app downloads from **10K to 50K+**.
- Integrated **Firebase Analytics, Crashlytics, Push Notifications**, and improved stability.
- Implemented **SSO** to reduce login time and enhance **user experience**.
- Built **RBAC system**, cutting **admin response** time from days to **under one hour**.
- Enabled in **3PL delivery integration** for smoother logistics operations.
- Implemented a **3rd-party payment gateway** for secure, seamless transactions.

Shanto-Mariam University of Creative Technology, Dhaka

Software Engineer (July.2024 – Dec. 2024)

- **Maintained and configured web servers** via Apache and Putty for stable operations.
- Developed **E-Ticketing system and mobile app**, enhancing user accessibility and experience.
- **Optimized applications** to reduce downtime and improve performance.

Intern Software Engineer (Jan.2024 – Jun. 2024)

- Developed **website designs** with **WordPress and Elementor**, improving UI/UX.
- Collaborated with the team to **streamline development workflow**.

Education

Shanto-Mariam University of Creative Technology

Bachelor's Degree in Computer Science & Engineering (Mar. 2022 - Feb. 2026) (Expected)

- Built **digital circuits** and logic gates in Digital Logic Design.
- Studied **SDLC and Agile** methodologies in Software Engineering.
- Created an **IoT Smart Dustbin** using Arduino.
- Learned **Database Design, Data Structures, and OOP** concepts.

Projects

BDStall (50k+ download, Flutter App)

- Multi-seller B2B/B2C eCommerce app
- Online order & payment gateway
- Product search & filter system
- Order tracking & notifications
- Seller dashboard management

Task Manager (Flutter App)

- GetX State Management
- REST API Integration
- Secure Authentication

Chating App (Flutter App)

- Real-Time Messaging
- Uses firebase

Skills

Mobile App Development

- Flutter, Dart – scalable Android apps with REST API integration
- Firebase (Auth, Firestore, Cloud Messaging, Crashlytics)
- GetX state management, Clean Architecture and MVVM patterns

Web Development

- WordPress & Elementor for dynamic website design
- Responsive and SEO-friendly layout building

Tools & Collaboration

- Git, GitHub, Postman, Android Studio, VS Code
- Agile workflow, debugging, and API testing

Certificate & Achievements

- Champion – Intra Dept Programming Contest, SMUCT (2022 & 2023)
- ICPC Regional Onsite Contestant, Daffodil International University (2024)
- IUPC Onsite Contestant, SUST (2023)
- Hackathon Participant, IUBAT (2024)
